

Rose Farm College of Equine Studies

Equine Bowen Therapy Training

**Rose Farm College of Equine Studies
Rose Farm, Scotts Lane
Cattcott, Somerset
TA7 9HX
www.rosefarmequine.co.uk**

What the course includes;

*** Learning how to assess the horse, firstly by observing it, then palpating it, followed by performing the full Equine Bowen Treatment, to include the basic treatment, plus additional moves and stretches in specific areas of tension, pain or discomfort.**

*** Case studies – to include 10 different horses between levels One and Three, to be assessed (static and dynamic), photographed, saddle checked inc wither pattern, and treated three times. Each horse must have a full report including any exercises or stretches you have suggested.**

Between levels Three and Five another 10 horses must be assessed, photographed, saddle checked, and treated three times, but this time you must also include 3 of their riders, this will include 3 rider treatments, and a full report, with the emphasis on how they now work together.

*** 2 assignments will be required, one discussing Tack, Fitting and problems associated with it. The other will be Anatomy & Physiology, including discussion relating to two of the internal systems, how they work together, and what impact Bowen may have on them.**

*** Safety in the stable environment, horse handling particularly when being treated.**

*** Liaising with the vets, and other professionals involved with the treatment of your clients horse. Getting permission to treat.**

*** Conformation, the good the bad and the ugly. Looking at the horse in specific areas and also as a whole. Why some conformational defects will affect movement and the wear & tear on joints.**

*** Anatomy & Physiology, including learning the superficial muscle structure of the horse, how particular muscles act on the horses way of going and skeleton, we will also cover the deeper muscles, digestive, respiratory and lymphatic systems.**

*** Gait and locomotion, observing the way the horse moves, both on the lunge and with a rider.**

*** How the Bowen takes effect, we shall have sessions where we observe the horse and rider before and after a Bowen treatment.**

- * Saddle fitting, Julia Garrett will be give a lecture and demonstration on fitting saddles, and how to recognise an ill-fitting saddle, different types of flocking, different systems available and by opening up a saddle will show you the mechanics within it.**
- * Equine Dentistry, Henry Billson or Toby Lee from Equine Dental Services, will give a lecture and demonstration on equine dentistry. Showing how the inside of the horse's mouth & teeth have such an important part to play, in the whole body balance.**
- * Getting horses fit and the pit falls of training, Nikki Stephens will give a talk on training various types of horses, inc Dressage, Eventers & Racehorses. She will help to give an insight into the problems and injuries horse owners face when training and competing. With more years of experience than even she would like to recall, including competing, breaking and training. Nikki rides both shod and barefoot horses (trimming most herself with assistance from Trevor Jones EP), in treed and treeless saddles so can give a view on both, she currently has about 50 horses in her care.**
- * Equine Podiatry (Barefoot trimming) Lindsay Cotterell will demonstrate trimming and foot balance, giving the pros and cons of barefoot trimming and how to condition the barefoot horse, she will also help us asses movement and show how foot balance will affect other areas of the horses structure. Using video and experiences to share during her lecture.**
- * Preparing your clients, a range of stretch exercises and strengthening techniques to suggest to your clients. This will include the safe way to stretch a horse and some simple exercises.**
- * Business matters, especially yours! How to go about telling the world you are here, PR, leaflets, cards, website, talks etc. What you should carry in your car.**
- * An insight to nutrition, why the feeds being given may be leading to particular behaviour or condition problems.**
- * Level 5 includes a written and practical exam inc conformation**

www.rosefarmequine.co.uk

How to find us

We are located just off the A39 at Catcott TA7 9HX if you have sat nav.

From the M5, come off at Jct 23, take the Glastonbury exit from the roundabout, follow this road over the hill and down to the T junction and turn left. Follow the A39 for about 5 miles and you will see the Catcott turn on your left, take it and we are the 1st farm on the right (visible from the main road).

From the A303, come off the A303 at the Podimore roundabout and take the Somerton exit. About 1.5 miles take the right turn towards Somerton, Street & Glastonbury. By pass Somerton and pass through Compton Dundon, as you get to the top of the hill (Street Hill) you will find a X roads, take the fairly sharp left towards Ashcott & Bridgwater. Follow this road to the other end (beside the Pipers Inn) and turn left, then continue straight on and pass through the village of Ashcott. About 1.5 miles out of the village you will find a right turn to Catcott, take this and we are the 1st farm on the right (visible from the main road).

From Wells, follow the signs to Glastonbury, then Bridgwater, after passing through the village of Walton, you will come past the Pipers Inn (on your left) continue through the village of Ashcott. About 1.5 miles out of the village you will see a right turn to Catcott, take this and we are the 1st farm on the right (visible from the main road).

Health and Safety

NO SMOKING anywhere on Rose Farm

In the event of an accident or emergency, call **999**, in the event of a fire, turn horses out into the school or paddocks and collect at the Muster point – Entrance Gate.

Sturdy leather boots preferably with Steel toe caps - **NO TRAINERS or WELLIES**

Trousers - Jeans, Jodhpurs, cords etc. - **NO SHORTS**

Long sleeve tops whilst treating

Ensure any box or crate you bring to stand on, is made of durable plastic and is stable when stood on even on a horses straw bed. **NO METAL BOXES WILL BE ALLOWED.**

Horses by their nature are unpredictable, they can kick and bite without giving notice!

Before entering the stable, look around for any obstacles, equipment, slippery / wet / icy surfaces, etc which could become a health and safety hazard or issue.

Ensure any droppings are removed from the stable, before you asses or begin treatment.

During a treatment, a horse may experience all sorts of reactions, in places not necessarily found when palpating.

Be very aware that any horse, however docile it can seem, has the potential to become angry without notice.

Whilst handling the horse, ensure you have full control at all times. Hold the halter rope at a short, safe length to prevent the horse from either turning round or from biting / kicking you, and concentrate fully on the job in hand.

Ensure that all head collars, bridles and other equipment are stored safely after use.

Be aware that there will be horses and vehicles moving around on the yard.

Fire extinguishers are located inside the door of the training room and a 1st aid kit is located above them (these will be pointed out on arrival).

**ABOVE ALL PLEASE STAY ALERT, LOOK OUT FOR EACH OTHER,
AND BE ON THE LOOK OUT FOR POTENTIAL DANGER.
HORSE'S ARE BY THEIR NATURE UNPREDICTABLE,
AND IT IS UP TO US ALL TO FORSEE, WHAT COULD BECOME A PROBLEM.**

This is your copy to keep
